

Course ref	AM31
Course title	Preparing for the ISO 55000 standards for asset management
Duration	2 days
Class Size	Min 6, max 16
Overview	A preparation guide to the ISO55000 series of standards and their business implications.
Objective	<p>At the end of the course participants will:</p> <ul style="list-style-type: none">• Understand the role, embedded principles and requirements of the ISO55000 family of standards for asset management.• Understand the implications of these standards for their organisation, including opportunities and business benefits• Be able to plan the preparatory actions for the adoption of these standards• Be able to explain to others the requirements, role and benefits of adopting ISO55000
Content	<p>The course provides the background to the ISO55000 standards, including relationship to, derivation from and differences from the BSI PAS55 specification for optimal management of physical assets. It refreshes the underlying concepts of joined-up, whole life cycle, optimized asset management, and clarifies the emerging international consensus on key terms and definitions. Most importantly, it explains the requirements specification (ISO55001) for a management system and outlines the implementation challenges and ways forward.</p> <p>Finally it covers the preparatory steps, and communications messages that help an organisation prepare for the standards, whether as an asset owner/operator or as a service provider.</p>
Benefit	Detailed understanding of the content, implementation and opportunities represented by the ISO55000 standards. Early adopter opportunities and the insights helpful in managing expectations of different stakeholders (customers, regulators, investors, staff and suppliers/partners).
Audience	This course is applicable to senior management from any organisation responsible for complex or critical assets and functional systems. In particular senior planning managers, heads of operational excellence, quality, management systems, standards and audit functions.
Pre-requisites	Although no pre-qualification is required, familiarity with management systems, organisation development and/or regulatory affairs may be an advantage.
Cross references	AM1 or equivalent introduction to Asset Management and PAS 55.
